### **Building A Renewable Future At Construct**

One of Northern Ireland's leading bodies aimed at raising awareness about issues concerning climate change and promoting renewables as a solution, has today, Thursday 16<sup>th</sup> February, announced that it is title sponsor of the new look Construct Building Exhibition, incorporating Plan Expo at the King's Hall from 9<sup>th</sup> – 11<sup>th</sup> March. Action Renewables intend that the sponsorship will further communicate to the construction industry the renewable technologies available for use by contractors throughout Ireland.

As part of the sponsorship, Actions Renewables will be involved with the construction of a state-of-the-art Show House which will be located outside the King's Hall. The Show House will provide all architects, contractors and visitors to Construct Incorporating Plan Expo with a visual understanding of the integration of a significant number of renewable technologies available to the construction industry.

Commenting on the sponsorship, Dr Andy Mc Crea, Director, Action Renewables, says:

*"Construct Incorporating Plan Expo will provide an opportunity for the suppliers of renewable technologies across the world to showcase their products/materials to the Northern Ireland construction industry. We are delighted to be associated with many of those showcasing their products and look forward to discussing the opportunity of utilising our renewable sources with all those attending."*

Garret Buckley, Joint Managing Director of Expo Exhibitions, says:

*"The whole area of renewable energy, energy efficiency and sustainability is playing an increasingly important role in the construction industry; subsequently we are very pleased to have the support of Action Renewables for the event."*
