

## blomus RELAX – CHIMO Fireplace

---

### Mobile Fireplaces from blomus

Fire has its own magic. In its glow every moment is lived more intensely – filled with an inner peace, overpowered by the romantic atmosphere or just because looking into the flames is so magnetic. A real fire is fascinating – and at any time of the year. The new CHIMO Fireplaces from blomus provide the companionship of fire as often as you want and anywhere at home. blomus says goodbye to the classic living room location for a fire and just like that takes the crackling excitement to the bedroom or perhaps better to the patio to let the mild summer evening die away under the enchantment of fire. For variety CHIMO can be placed in the kitchen on the following day where it can illuminate the perfect dinner party with friends. And you don't even have to stack and store yards of wood beforehand. The CHIMO Fireplace can be used without a flue in any location you desire. Ethanol is used as the fuel which is poured into a container and ignited. CHIMO is available in two stainless steel designs and even without a fire justifiably lays claim to being a design object for the living room. Slim, round and beautiful. CHIMO represents the space-saving solution for the fulfilment of a wish to have a fireplace in your house or apartment.

All blomus fires are in accordance with the technical safety requirements of TÜV / UL (USA) with regard to fire security and operational safety.
