

blomus RELAX – FUENTE Water Fountains

The skilful game with the elements

Water, fire, earth, air – the four elements of life. blomus design plays with them and creates functional objects of elemental beauty and beam with emotional strength. The new FUENTE water fountains are proof of this. The opposing materials of stainless steel and gentle white porcelain are enough to create an interesting field of tension. Water as the third element subtly plays around the porcelain and creates the dynamic connection between the materials. Shaped in a simple design as a column, as a floor-standing model or in the smaller design for a table or shelf, FUENTE is effective as a refreshing spring with character.
